PROJECTS

Netflix Web App Clone

Objective: Developed a Netflix-like web application to provide users with a seamless movie and TV show browsing experience.

Key Responsibilities:

- User Research: Conducted user research to understand the essential features and user expectations for a streaming platform.
- Wire-framing and Prototyping: Created wire-frames and interactive prototypes using Photoshop to visualize the user interface and user flows.
- Front-End Development: Implemented the application using React.js, focusing on component-based architecture for better maintainability.
- Deployment: Deployed the application on GitHub Pages for easy access and demonstration.

Tools and Technologies:

Frontend: React.js, Redux, React Router
Styling: CSS Modules, Styled Components
API: TMDb API
Authentication: Firebase Authentication
Prototyping: Photoshop
Deployment: GitHub Pages
